Perma-Fix Announces Financial Results and Provides Business Update for the Fourth Quarter and Full Year 2013

ATLANTA – April 15, 2014 – Perma-Fix Environmental Services, Inc. (NASDAQ: PESI) (the "Company") today announced results for the fourth quarter and full year ended December 31, 2013.

Dr. Louis F. Centofanti, Chairman and Chief Executive Officer, stated, "As we have discussed in the past, 2013 was a challenging year due to reduced government spending and two large projects that consumed a significant portion of the Department of Energy (DOE) budget. In response to these challenges, we dramatically reduced our fixed expenses in 2013. Although we continued to feel the effects of delayed government spending in the first quarter of 2014, we are finally seeing a gradual improvement in waste shipments beginning in the second quarter of 2014. We expect to see continued improvement in the balance of the second quarter, and even more so in third quarter of 2014 due to an increase in the DOE's 2014 budget, which was only recently approved. Based on historical spending patterns and early indications, we are optimistic the new DOE budget will translate to increased spending on discretionary projects, including waste treatment. With the Congressional budget now resolved, we also believe that the DOE will begin awarding service contracts that have been delayed, and we believe that we are very well positioned on a number of these projects."

"We have made additional progress in further validating our medical isotope technology. We recently formed a wholly-owned subsidiary, Perma-Fix Medical Corporation, to help facilitate commercialization of our technology to produce Technetium-99m. We have witnessed a growing interest in our technology from within the industry, and we are working closely with the leading nuclear research institutions in the U.S. and Europe, where there has been a lot of attention to the supply chain and risk of shortages related to Tc-99m. We believe there is an aggressive push to commercialize our technology since our process can address global market needs for Tc-99m without the use of weapons grade uranium. We believe our process will also help reduce environmental concerns associated with the current production methodology, including issues around reprocessing of materials and production of high level waste requiring permanent disposal."

Financial Results

Revenue for the fourth quarter of 2013 was \$12.7 million versus \$26.7 million for the same period last year. Revenue for the Treatment Segment decreased to \$9.2 million from \$11.6 million for the same period in 2012. Revenue from the Services Segment was \$3.5 million versus \$15.1 million for the same period in 2012.

Gross profit for the fourth quarter of 2013 was \$2.1 million versus \$3.3 million for the fourth quarter of 2012 primarily due to lower revenue and revenue mix. Gross margin increased to 16.7% from 12.3% for the same period last year.

Operating loss for the fourth quarter of 2013 was \$28.5 million versus operating loss of \$1.7 million for the fourth quarter of 2012. Our operating loss for the fourth quarter of 2013 included a goodwill impairment charge of approximately \$26.7 million for our Treatment and Services Segments. Net loss attributable to common stockholders for the fourth quarter of 2013 was \$31.4 million, or (\$2.75) per share, versus net loss of \$633,000 or (\$0.06) per share, for the same period in 2012. In addition to the impairment loss on goodwill noted above, our net loss for the fourth quarter of 2013 included a charge to tax expense of approximately \$4.8 million (approximately \$3.6 million for our continuing operations and approximately \$1.2 million for our discontinued operations) to provide a full valuation allowance on our net deferred tax assets. Our auditors will be issuing an unqualified opinion that includes a going concern explanatory paragraph.

The Company reported a loss of Adjusted EBITDA of \$1.5 million from continuing operations during the quarter ended December 31, 2013, as compared to Adjusted EBITDA of approximately \$76,000 for the same period of 2012. The Company defines EBITDA as earnings before interest, taxes, depreciation and amortization. EBITDA and Adjusted EBITDA are not measures of performance calculated in accordance with Generally Accepted Accounting Principles in the United States ("GAAP"), and should not be considered in isolation of, or as a substitute for, earnings as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. The Company believes the presentation of EBITDA is relevant and useful by enhancing the readers' ability to understand the Company's operating performance. The Company's management utilizes EBITDA as a means to measure performance. The Company's measurements of EBITDA may not be comparable to similar titled measures reported by other companies. Due to the unique accounting for the recognition of fair market value of percentage of completion contracts resulting from the acquisition of SEC and the goodwill impairment charges recorded within our Segments, the Company recognizes that EBITDA is an "Adjusted EBITDA" and understands these differences when measuring performance. The table below reconciles EBITDA and Adjusted EBITDA, both non-GAAP measures, to loss from continuing operations for the three and twelve months ended December 31, 2013 and 2012.

This press release contains "forward-looking statements" which are based largely on the Company's expectations and are subject to various business risks and uncertainties, certain of which are beyond the Company's control. Forward-looking statements generally are identifiable by use of the words such as "believe", "expects", "intends", "anticipate", "plan to", "estimates", "projects", and similar expressions. Forward-looking statements include, but are not limited to: expect to see continued improvement in the balance of the second quarter, and even more so in third quarter of 2014; increased DOE spending on discretionary projects; the DOE will begin awarding service contracts that have been delayed; we are very well positioned on a number of DOE projects; we believe our process will also help reduce environmental concerns associated with the current production methodology; and aggregate push to commercialize our technology. These forward-looking statements are intended to qualify for the safe harbors from liability established by the Private Securities Litigation Reform Act of 1995. While the Company believes the expectations reflected in this news release are reasonable, it can give no assurance such expectations will prove to be correct. There are a variety of factors which could cause future outcomes to differ materially from those described in this release, including, without limitation, future economic conditions; industry conditions; competitive pressures; our ability to apply, commercialize, and market our new technologies; the government or such other party to a contract granted to us fails to abide by or comply with the contract or to deliver waste as anticipated under the contract; that Congress provides continuing funding for the DOD's and DOE's remediation projects; ability to obtain new foreign and domestic remediation contracts; our ability to fund the commercialization of our technology; and the additional factors referred to under "Special Note Regarding Forward-Looking Statements" of our 2013 Form 10-K. The Company makes no commitment to disclose any revisions to forward-looking statements, or any facts, events or circumstances after the date hereof that bear upon forward-looking statements.
