Perma-Fix Reports 112% Increase in Revenue to \$24.9 Million for the First Quarter of 2020; Achieves \$1.2 Million of Net Income

Service Segment Revenue Increases Eight-Fold to \$15.3 Million

ATLANTA – May 12, 2020 – Perma-Fix Environmental Services, Inc. (NASDAQ: PESI) (the “Company”) today announced financial results and provided a business update for the first quarter ended March 31, 2020.

First Quarter 2020 Financial Highlights:

- Revenue for the first quarter of 2020 increased 112.3% to \$24.9 million versus \$11.7 million for the same period last year
- Services Segment revenue for the first quarter of 2020 increased 748% to \$15.3 million versus \$1.8 million for the same period last year
- Treatment Segment revenue for the first quarter of 2020 was \$9.6 million compared to \$9.9 million for the same period last year
- Gross profit for the first quarter of 2020 increased to \$4.6 million versus \$2.5 million for the same period last year
- Achieved net income attributable to common stockholders of \$1.2 million, or \$0.10 per share for the first quarter of 2020, compared to a loss of \$672,000, or (\$0.06) per share for the same period last year
- Generated Adjusted EBITDA (defined below) of \$1.9 million compared to \$67,000 for the same period last year (see reconciliation to GAAP below)
- Extended Credit Facility with PNC Bank through May 15, 2024 and increased Revolver Capacity from \$12 million to \$18 million

Mark Duff, President and CEO of the Company, commented, “We more than doubled revenue in the first quarter of 2020 versus the same period last year, and achieved a double digit sequential increase in revenue versus the fourth quarter of 2019, even though the first quarter is historically a seasonally weak period. We attribute this improvement to implementation of our strategic plan resulting in growth in our Services Segment, which increased more than eight-fold versus the same period last year. Not only have we been awarded a number of new contracts within the Services Segment, but our sales pipeline remains robust with a number of ongoing bidding opportunities. Despite some delays in shipments related to the impact of COVID-19 in mid-March, our Treatment Segment was able to work off backlog and continues to diversify waste streams and waste receipts within the commercial sector.

COVID-19

The Company has made adjustments and implemented precautions necessary to limit the impact of the COVID-19 pandemic on its ongoing operations. The Services Segment began demobilization activities at certain projects in mid- to late-March and numerous waste shipments from Treatment Services clients were delayed at that time. This resulted in temporary layoffs for many project personnel along with implementation of work-from-home policies. This impact has continued through the month of April but the Company is beginning to remobilize on certain projects as field crews are being reactivated to support these efforts. The Company believes it has sufficient backlog to address the recent slowdown and further believes that shipments will resume in June to begin replenishing the backlog for the Treatment Segment. Perma-Fix is not aware of any COVID-19 cases to date of employees within the Company. The Company believes that the pandemic could result in disruption to its financial results in the second quarter and the full impact and extent of the pandemic is difficult to fully assess at this time. As such, further disruptions could have a material impact on the Company's results. Due to the risks associated with COVID-19, as well as the reduction in force that Perma-Fix pursued, the Company was successful in securing a promissory note through PNC Bank in the amount of \$5.6 million under the Paycheck Protection Program ("PPP") that was established under the recently enacted Coronavirus Aid, Relief, and Economic Security Act ("CARES"). These funds have allowed Perma-Fix to recall all staff and currently expects to avoid future furloughs and layoffs for eligible employees, however, the situation remains fluid and the Company is continuing to carefully monitor the situation.

Financial Results

Revenue was \$24.9 million for the first quarter of 2020 as compared to \$11.7 million for the corresponding period of 2019. Revenue for the Services Segment increased to \$15.3 million for the first quarter of 2020 from \$1.8 million for the same period in 2019 primarily due to the awards of several contracts/task orders for project work starting in the latter part of the first quarter of 2019 resulting from the success of our implemented strategic plan in winning contract bids. Revenue for the Treatment Segment decreased approximately \$342,000 to \$9.6 million for the first quarter of 2020 from \$9.9 million for the same period in 2019 primarily from lower waste volume.

Gross profit for the first quarter of 2020 was \$4.6 million versus \$2.5 million for the first quarter of 2019 primarily due to higher revenue in the Services Segment. Gross profit for the first quarter of 2019 included additional closure costs recorded in the amount of approximately \$165,000 in connection with the finalization of costs in connection with the closure of the Company's East Tennessee Material and Energy ("M&EC") facility.

Operating income for the first quarter of 2020 was approximately \$1.4 million versus operating loss of \$624,000 for the first quarter of 2019. Net income attributable to common stockholders (both common and diluted) for the first quarter of 2020 was \$1.2 million or \$0.10 per share versus net loss of \$672,000 or (\$0.06) per share, for the same period in 2019.

The Company reported Adjusted EBITDA of \$1.9 million from continuing operations at March 31, 2020, as compared to Adjusted EBITDA of \$67,000 from continuing operations during the corresponding period of 2019. The Company defines EBITDA as earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA before research and development costs related to the Medical Isotope project and closure costs accrued for M&EC subsidiary. Both EBITDA and Adjusted EBITDA are not measures of performance calculated in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP"), and should not be considered in isolation of, or as a substitute for, earnings as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. The Company believes the presentation of EBITDA and Adjusted EBITDA is relevant and useful by enhancing the readers' ability to understand the Company's operating performance. The Company's management utilizes EBITDA and Adjusted EBITDA as means to measure performance. The Company's measurements of EBITDA and Adjusted EBITDA may not be comparable to similar titled measures reported by other companies. The table below reconciles EBITDA and Adjusted EBITDA, both non-GAAP measures, to GAAP numbers for income (loss) from continuing operations for the three months ended March 31, 2020 and 2019.
